Doctor Preference Profile

We understand that each Doctor has different preferences when it comes to their cases. These preferences can directly impact the success of your cases as well as patient satisfaction. By filling out a Doctor Preference Profile, we can store your individual preferences and use them to customize cases to your exact specifications. This profile also lets us know how to proceed in any given scenario, such as what to do in the lack of occlusal clearance, and how you would like for our lab to communicate with your practice.
